**The Johns Hopkins Center for Public Health Preparedness,
Center for a Livable Future,
and the NIEHS Center in Urban Environmental Health Present:**

THE HEAT IS RISING: WHAT YOU NEED TO KNOW ABOUT CLIMATE CHANGE AND PUBLIC HEALTH

**Friday April 6, 2007
8:30 a.m. - 5:00 p.m.**

Sheldon Hall, Johns Hopkins Bloomberg School of Public Health

Keynote Speaker: James E. Hansen, PhD

“Dr. James Hansen, Director of NASA’s Goddard Institute for Space Studies since 1981, is widely regarded as the government’s top climate change scientist. In addition to his glowing scientific credentials, he has been an inspiration to health professionals and scientists of all types due to his indefatigable drive to educate the public about the consequences of unchecked global warming—even in the face of governmental administration attempts to silence him. Moreover, he has a talent for presenting complex scientific concepts in ways that everyone can understand. We are extremely pleased and honored to have Dr. Hansen as our Keynote Speaker.”

Continuing Education: (1) This event has been approved for a maximum of 7.50 AMA PRA Category 1 Credit(s)[™] by the Johns Hopkins University School of Medicine Advisory Committee on Continuing Medical Education.

(2) The Institute for Johns Hopkins Nursing is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center’s Commission on Accreditation. This 7.5 contact hour Educational Activity (Provider Directed/Learner Paced) is provided by the Institute for Johns Hopkins Nursing.
